Map of Conservation Practices in Fillmore County (as reported in eLINK for the MN Board of Water and Soil Resources)

Outputs and Outcomes

Outputs:

2017: No activities to report in 2017.

2018: Five cost share contracts were approved by the Fillmore SWCD Board for two grassed waterways (one also using FY17 cost share grant funds), one grade stabilization structure and two well decommissionings. Projects completed and paid: two grassed waterways totaling 2115' at a cost of \$1935.42, one well decommissioning at a cost of \$1000, and one grade stabilization structure at a cost of \$10,000. TA: \$3,233.86 (72 hrs @\$44.89/hr.) TAA-Doug Keene

Outcomes:

Water pollution reduction estimates for projects completed:

- Estimated Soil Savings = 18.68 T/year
- Estimated Phosphorus reduction = 10.79 lbs/year
- Estimated Sediment (TSS) reduction = 23.80 T/year

Waterway needs are often evident after a rain event. A waterway's purpose is to:

- convey runoff from terraces, diversions or other water concentrations without causing erosion or flooding.
- reduce gully erosion.
- improve water quality.
